Training and Information

Research and training in Occupational Health

OCCUPATIONAL HEALTH

FITNESS FOR WORK assessment

Adapting work to worker's specific health condition

HEALTHY and safe workers

in

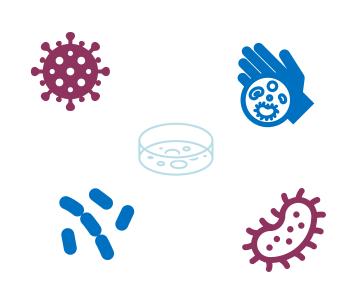

OCCUPATIONAL HEALTH

HEALTH SURVEILLANCE according to RISK FACTORS

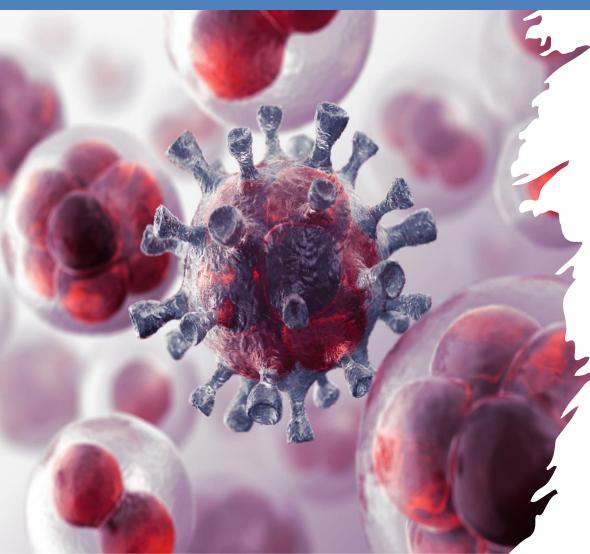

Vaccines are of particular importance for health workers because of a higher risk of transmission in health-care settings

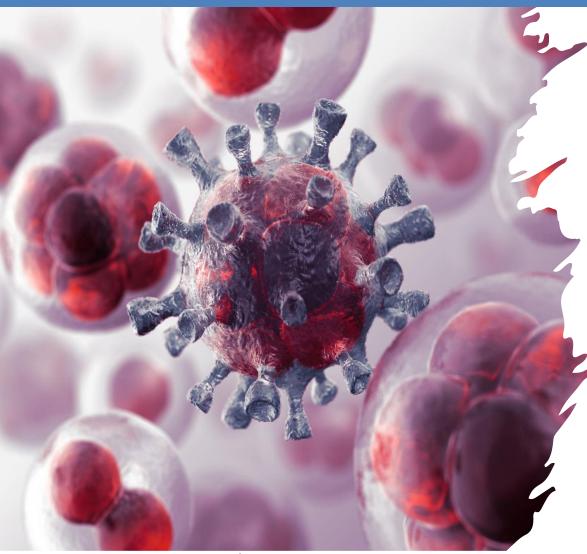

To ensure protection for themselves, their patients and communities, all health workers should be vaccinated

The paradigmatic case of the vaccination against Influenza and SARS-CoV-2
